

# Project 1 status report 3

**TA Mentor:** Haewon Hwang (hh474)

**Team Members:** Josh Zheng (zz459), Val Mack (dgm97), Jiangjie Man (jm2559)

## What we have done:

- Read documentation on Quandl API and scrape data
- Look deeply into the dataset, understand the data, and clean the data if needed
- Try to come up with the example plot by the end of next weekend
- Think about other potential ways of better visualizing the data
- Started the basic html for the web page
- Finalized what plots will be on the web page

Val

- Read documentation on Quandl API
- Started the basic html and code organization on Github
- Sketched website mockup with example plots
- Started scraping funding data from CBInsights
- Started map visualization

Josh

- Read documentation on Quandl API
- Understand the data and come up with potential ways of visualize the data
- Searched related data that might be useful
- Started creating one of the visualizations
- Helped edit the report

Jiangjie

- Read documentation on Quandl API
- Started the basic html for the web page
- Collected datasets from Quandl
- Came up with an example plot showing VC amount raised by time

## What we will accomplish:

- Decide on final style theme
- Finish all visualizations
- Create final report

Val

- Finish scraping funding data from CBInsights by March 5th
- Finish map visualization
- Integrate code from each svg into a seamless design

Josh

- Finish one visualization by the end of the week
- Think of other potential ways of visualization
- Try to polish the visualization
- Start on writing final report

Jiangjie

- Finished two visualizations (VC fundings by series and by industries) by the end of the week
- Polish the graph making them clear and intuitive
- Started working on final report
