Project 2 status report 3

TA Mentor: James Chen (jzc24)

Team Members: Jiangjie Man (jm2559), Rou Qu (rq44), Xiuyan Xin (xx254)

Tasks completed since previous status report

Jiangjie Man (jm2559)

- Looked deeply into the data and thought about other ways of better visualizing the data
- Finalized what plots will be on the web page
- Started cleaning and reorganizing data

Rou Qu (rq44)

- Finalized what the visualization will look like
- Researched how we can better implement the data visualization
- Designed the slider feature which helps explore a complex data set

Xiuyan Xin (xx254)

- Modified the decided sketch
- Designed and implemented the San Francisco map
- Designed the format of input data

Tasks to be completed by the next status report

Jiangjie Man (jm2559)

- Start map visualization
- Polish the graph making them clear and intuitive
- Start on writing final report

Rou Qu (rq44)

- Polish the look and increase the aesthetic quality
- Combine each member's code together, and make sure the visualization is technical correct
- Finalize the report
    - A description of the mapping from data to visual elements

- A description why and where we got the data
- The story

Xiuyan Xin (xx254)

- Finish implementing the San Francisco map
- Finish the descriptive part of the implementation on the report
- Integrate code from each member
